Mohamed Khalil

Front-End Developer with a strong foundation in building modern, responsive web applications. Focused on performance optimization, crafting polished, intuitive user interfaces, using change detection tuning, observables and event-driven patterns to deliver smooth and responsive UIs.

EXPERIENCE

Full-Stack R&D Developer (FTC) *Oct 2025 - March 2026*
Dedalus · Bordeaux, France

- Built a secure end-to-end payment flow on the front end integrating the Swikly API, handling callbacks, error states, and transaction validation, eliminating manual steps and reducing transaction error rates.
- Developed within a proprietary JavaScript/XML rendering engine (SJS) to build a high-throughput document generation pipeline, transforming clinical records into responsive UI components in real time.
- Diagnosed and patched critical cross-stack defects across a large-scale medical information system in an Agile, ticket-driven workflow, reducing bug resolution time.

PROJECTS

Hoodizz – E-commerce Website *March - June 2026*
Cairo, Egypt.

- Built the front end of a full-stack streetwear e-commerce platform in Angular 21+ within an Nx monorepo (NestJS backend), architecting client-side state with three NgRx SignalStores (cart, product, order) for predictable, reactive data flow.
- Implemented Firebase auth with SSR-aware tokens and route guards, plus end-to-end Stripe Checkout covering the full cart-to-payment flow.

Media Dashboard – Web Application *May - June 2026*
Cairo, Egypt.

- Built an analytics dashboard SPA in Angular 21+ giving media buyers a unified, auto-synced view of Facebook Ads and Shopify campaign spend, revenue, and orders.
- Implemented OAuth 2.0 flows for the Facebook Marketing API and Shopify with a bring-your-own-credentials UX, Firebase Auth, and per-user data isolation enforced in the UI.

SKILLS

Programming Languages
TypeScript, JavaScript (ES6+), HTML5, CSS3, Python, SQL, GraphQL.

Libraries & Frameworks
Angular, RxJS, NgRx, Node.js, Tailwind CSS, Bootstrap.

Tools & Platforms
Git, GitHub, GitLab, Vercel, Heroku, Firebase, Docker, Webpack, Figma, Linux.

EDUCATION

M.Sc. Information Systems Design & Development
Academy H3 Hitema, France · 2022

M.Sc. Electronics & Embedded Systems
Université Claude Bernard, France · 2020

B.Sc. Electronics, Electrical Energy & Automation
Université Claude Bernard, France · 2018

LANGUAGES

Arabic (native) · English (fluent, TOEIC B2) · French (fluent, Delf B2)

INTERESTS

Web accessibility, clean front-end architecture, open-source tooling, and crafting polished, performant UI.
