Mohamed Khalil

Shopify & Custom E-commerce Web Developer

mohamed.khalil.ucbl@gmail.com | github.com/Mohamed-Khalil67 | linkedin.com/in/mohamed-khalil-ucbl

SUMMARY

Web developer who began in automotive embedded systems writing C, then moved into web development to build products people can see, use, and buy from. I build fast, conversion-focused e-commerce sites and web products for small businesses, startups, and agencies - pairing engineering rigor with design that sells.

TECHNICAL SKILLS

Front-end: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3
Back-end & data: Node.js, REST APIs, PostgreSQL, Firebase
Tooling: Git, Docker

SELECTED PROJECTS

Hoodizz - E-commerce store
Conversion-focused online store for a streetwear brand: product showcases, clear calls to action, checkout-ready layout.

FitCore Gym - Landing page
Membership-driven landing page for a fitness brand with a strong primary call to action.

DJI Mavic 4 - Product page
Product landing page with feature highlights and a guided buy flow.

The UX Review - Blog landing
Editorial landing page with featured articles and newsletter sign-up.

EDUCATION & MORE

References, detailed work history, and education available on request. Portfolio: see live projects and case studies on my website.
